SUMMARY

Motivated Computer Science student with hands-on experience in engineering, data analysis, and software development. Skilled in schema design, backend development, and programming. Strong collaborator and independent contributor dedicated to building projects that deliver real-world impact.

EDUCATION

B.S. Computer Science

Oakland University, Rochester, MI 3.41

September 2021 - April 2026

EXPERIENCE

Data Collector

Nissan North America, Farmington Hills, MI

May 2025 - Jun 2025

- Led ADAS testing operations across the U.S., managed vehicle setup, equipment troubleshooting, and real-time data collection.
- Handled setup, calibration, and troubleshooting of test equipment, including cameras, radar, and CANape configurations.
- Worked closely with engineers to provide feedback on vehicle performance and sensor behavior.

Data Analyst Intern

Hutchinson, Auburn Hills, MI

May 2024 - Sep 2024

- Developed data visualizations and dashboards to track business metrics using QlikSense.
- Queried relational databases using SQL to perform data analysis, create visualizations, and support reporting needs.
- Structured data into a normalized schema and created SQL queries to allow better data exploration.

Engineering Co-Op Student

Hutchinson, Auburn Hills, MI

May 2024 - Jan 2024

- Wrote VBA scripts to improve Excel-based quote generation for engineering teams.
- Maintained and organized SharePoint sites to ensure version control and improve team collaboration on documentation.
- Developed and presented technical presentations for OEMs, highlighting design updates, and project milestones.

PROJECTS

BrainRot Blocker | GrizzHacks Hackathon – 3rd Place Overall *JavaScript, NextJS, Python, Flask*

A website and Chrome extension designed to help users manage their screen time by blocking YouTube content until they complete homework problems. Developed RESTful APIs for managing user progress, balance updates, and reward logic. Designed and implemented backend architecture to handle real-time interactions between frontend and browser extension.

FitPalPro *Javascript, React, Python, Flask*

A react application that allows users to track their workouts, become friends with other people, and view their friends recent workouts. Created and implemented GET and POST in Flask to create requests for workout tracking and friendship management. Incorporated password hashing to ensure data security.

SKILLS

Programming Languages: Python, Java, JavaScript, C, SQL, HTML, CSS

Software Development: RESTful APIs, backend architecture, version control, debugging

Interests: Weightlifting, golf, basketball, gaming
